*Culturing Microorganisms | AQA GCSE Biology Revision Notes*  
The body contains three different types of blood vessel: Arteries: transport blood away from the heart (usually at high pressure) Veins: transport blood to the heart (usually at low pressure) Capillaries: have thin walls which are “leaky”, allowing substances to leave the blood to reach the body’s tissues. The walls of each type of blood vessel have a structure that relates to the function of the vessel.
