THE ADULT SPEECH THERAPY WORKBOOK is your go-to resource for handouts and worksheets. It was designed for speech therapists new to adult speech therapy and covers the most common diagnoses and disorders across all adult speech therapy settings, from hospitals, to skilled nursing facilities, to home health. This workbook is packed with over 580 pages of practical, evidenced-based treatment material.

PROFESSIONAL ISSUES IN SPEECH-LANGUAGE PATHOLOGY AND AUDIOLOGY, 4E, International Edition explores the most relevant and critical issues related to professional practice in the field of Communication Sciences and Disorders today. Written by a variety of highly regarded experts in the field, each chapter delves into a critical issue, such as research, education and health care policies, infection prevention, service delivery, multicultural populations, and more. Comprehensive in coverage, the topics provide an up to date view of the profession while preparing readers to earn their ASHA Certificate of Clinical Competence. In-depth discussions also address professional pathways and organizations, employment issues, and ethical-legal considerations to get readers thinking about career advancement and success in any setting.

A modern guide to computational models and constructive simulation for personalized patient care using the Digital Patient The healthcare industry 's emphasis is shifting from merely reacting to disease to preventing disease and promoting wellness. Addressing one of the more hopeful Big Data undertakings, The Digital Patient: Advancing Healthcare, Research, and Education presents a timely resource on the construction and deployment of the Digital Patient and its effects on healthcare, research, and education. The Digital Patient will not be constructed based solely on new information from all the " omics " fields; it also includes systems analysis, Big Data, and the various efforts to model the human physiome and represent it virtually. The Digital Patient will be realized through the purposeful collaboration of patients as well as scientific, clinical, and policy researchers. The Digital Patient: Advancing Healthcare, Research, and Education addresses the international research efforts that are leading to the development of the Digital Patient, the wealth of ongoing research in systems biology and multiscale simulation, and the imminent applications within the domain of personalized healthcare. Chapter coverage includes: The visible human The physiological human The virtual human Research in systems biology Multi-scale modeling Personalized medicine Self-quantification Visualization Computational modeling Interdisciplinary collaboration The Digital Patient: Advancing Healthcare, Research, and Education is a useful reference for simulation professionals such as clinicians, medical directors, managers, simulation technologists, faculty members, and educators involved in research and development in the life sciences, physical sciences, and engineering. The book is also an ideal supplement for graduate-level courses related to human modeling, simulation, and visualization.

This book continues as volume 3 of a multi-compendium on Edible Medicinal and Non-Medicinal Plants. It covers edible fruits/seeds used fresh or processed, as vegetables, spices, stimulants, edible oils and beverages. It encompasses species from the following families: Ginkgoaceae, Gnetaceae, Juglandaceae, Lauraceae, Lecythidaceae, Magnoliaceae, Malpighiaceae, Malvaceae, Marantaceae, Meliaceae, Moraceae, Moringaceae, Muntingiaceae, Musaceae, Myristicaceae and Myrtaceae. This work will be of significant interest to scientists, researchers, medical practitioners, pharmacologists, ethnobotanists, horticulturists, food nutritionists, agriculturists, botanists, conservationists, lecturers, students and the general public. Topics covered include: taxonomy; common/English and vernacular names; origin and distribution; agroecology; edible plant parts and uses; botany; nutritive and pharmacological properties, medicinal uses and research findings; nonedible uses; and selected references.

The Home Health SLP Handbook is the one resource that any Speech-Language Pathologist needs to become a home health therapist for adults. Includes 100+ pages of practical treatment guides, 60+ pages of patient handouts, and 30+ pages of evaluation forms, all evidence-based! The handbook also comes with practical guides including Home Visit Safety, How to Complete an Oasis Evaluation, and Documentation Examples.

Informed consent - as an ethical ideal and legal doctrine - has been the source of much concern to clinicians. Drawing on a diverse set of backgrounds and two decades of research in clinical settings, the authors - a lawyer, a physician, a social scientist, and a philosopher - help clinicians understand and cope with their legal obligations and show how the proper handling of informed consent can improve , rather than impede, patient care. Following a concise review of the ethical and legal foundations of informed consent, they provide detailed, practical suggestions for incorporating informed consent into clinical practice. This completely revised and updated edition discusses how to handle informed consent in all phases of the doctor-patient relationship, use of consent forms, patients' refusals of treatment, and consent to research. It comments on recent laws and national policy, and addresses cutting edge issues, such as fulfilling physician obligations under managed care. This clear and succinct book contains a wealth of information that will not only help clinicians meet the legal requirements of informed consent and understand its ethical underpinnings, but also enhance their ability to deal with their patients more effectively. It will be of value to all those working in areas where issues of informed consent are likely to arise, including medicine, biomedical research, mental health care, nursing, dentistry, biomedical ethics, and law.

The Adult Dysphagia Pocket Guide: Neuroanatomy to Clinical Practice is a concise, easily portable reference guide designed specifically for the dysphagia clinician. It centers on the clinical application of normal and abnormal swallowing physiology as it relates to cranial nerves, muscles, and innervations. The text merges clinical neurophysiology of the swallow directly to assessment and treatment of dysphagia to provide quick access of key clinical information and solutions for clinicians as they are completing their swallowing assessments. A discussion of laboratory values and medications in chapters three and four and how they can impact dysphagia adds another layer of uniqueness to this guide. Recurring "clinician's note" and "research to practice" boxes are based on the current research and provide practical and useful tips for clinicians. The Adult Dysphagia Pocket Guide is a "quick reference" that answers the need for a practical guide that new clinicians, graduate students, and even seasoned clinicians can carry with them and readily access while they are completing their evaluations. It is a must-have resource for any speech-language pathologist treating dysphagia. KEY FEATURES: Compact, yet portable designSuccinct, yet thorough evidence based informationClinically relevant charts and tables make information easy to find

Maintaining a question-and-answer format, this second edition provides simplified means of solving nearly 200 practical problems that confront engineers involved in the planning, design, operation and maintenance of steam plant systems. Calculations pertaining to emissions, boiler efficiency, circulation and heat transfer equipment design and performance are provided. Solutions to 70 new problems are featured in this edition. Amidst the pressing challenges of global climate change, the last decade has seen a wave of forest carbon projects across the world, designed to conserve and enhance forest carbon stocks in order to reduce carbon emissions from deforestation and offset emissions elsewhere. Exploring a set of new empirical case studies, Carbon Conflicts and Forest Landscapes in Africa examines how these projects are unfolding, their effects, and who is gaining and losing. Situating forest carbon approaches as part of more general moves to address environmental problems by attaching market values to nature and ecosystems, it examines how new projects interact with forest landscapes and their longer histories of intervention. The book asks: what difference does carbon make? What political and ecological dynamics are unleashed by these new commodified, marketized approaches, and how are local forest users experiencing and responding to them? The book 's case studies cover a wide range of African ecologies, project types and national political-economic contexts. By examining these cases in a comparative framework and within an understanding of the national, regional and global institutional arrangements shaping forest carbon commoditisation, the book provides a rich and compelling account of how and why carbon conflicts are emerging, and how they might be avoided in future. This book will be of interest to students of development studies, environmental sciences, geography, economics, development studies and anthropology, as well as practitioners and policy makers.
