One hundred stereotype maps glazed with the most exquisite human prejudice, especially collected for you by Yanko Tsvetkov, author of the viral Mapping Stereotypes project. Satire and cartography rarely come in a single package but in the Atlas of Prejudice they successfully blend in a work of art that is both funny and thought-provoking. The book is based on Mapping Stereotypes, Yanko Tsvetkov's critically acclaimed project that became a viral Internet sensation in 2009. A reliable weapon against bigots of all kinds, it serves as an inexhaustible source of much needed argumentation and-occasionally-as a nice slab of paper that can be used to smack them across the face whenever reasoning becomes utterly impossible. The Complete Collection version of the Atlas contains all maps from the previously published two volumes and adds twenty five new ones, wrapping the best-selling series in a single

extended edition.

This volume collects the most recent papers on artificial intelligence (AI) and expert systems written at The Rand Corporation. Rand's leadership in the field of AI started with the seminal work of Newell, Shaw, and Simon some thirty years ago and continues with recent work in expert systems and knowledge-based simulation. The first chapter in this volume provides a brief historical perspective of Rand's AI activity from its early days in the 1950s to its current efforts. Special attention is given to Rand's research during the past decade.

Statistical Power Analysis is a nontechnical guide to power analysis in research planning that provides users of applied statistics with the

Judicial Process in America provides a comprehensive overview of the American judiciary. Considering the courts from every level, the authors thoroughly cover judges, lawyers, litigants, and the variables at play in judicial decision making. This remarkably current revision will only solidify the bookÆs position as the standard-bearer in the field.
