House cleaning has been an innate human activity forever but only since the early 19th century have mechanical devices replaced the physical labor (performed mostly by women). Mechanical carpet sweepers were replaced by manual suction cleaners, which in turn were replaced by electric vacuum cleaners in the early 20th century. Innovative inventors, who improved vacuum cleaners as electricity became commonly available, made these advances possible. Many early manufacturers failed, but some, such as Bissell, Hoover, Eureka and others, became household names as they competed for global dominance with improved features, performance and appearance. This book describes the fascinating people who made this possible, as well as the economic, cultural and technological contexts of their times. From obscure beginnings 200 years ago, vacuum cleaners have become an integral part of modern household culture.

Medical billing is one of the fastest-growing employment opportunities in the United States today. Insurance companies, medical offices, hospitals and other health care providers are in great need of trained personnel to create medical claims. This book will ensure learning the skills necessary to become a successful medical claims biller. It is presented in a comprehensive, yet user friendly way, following a logical learning format beginning with a broad base of information and then, step by step, following the course for creation of a medical claim. This book teaches the skills necessary to become a well-rounded medical biller. By completing this course of study with a satisfactory grade, the user will be granted a certificate and can have the opportunity to work towards an "Honors Certificate", which is even more valuable to a potential employer.

Good Health Abroad: A Traveller ' s Handbook guides travelers of possible risks to health, comfort and peace of mind encountered abroad. It discusses the steps to be taken before departure, during the journey, and upon arrival of the tourist. It addresses the measures to protect the health of the individual. Some of the topics covered in the book are the medical and dental check-up; active immunization; vaccination against smallpox, yellow fever, and cholera; optional vaccinations in regions of the world; optional vaccinations which are restricted to special categories of travelers; anti-glare precautions; and pre-travel exercises. The definition of acclimatization is covered. The medical, visa, and currency requirements are discussed. The text describes the clothing for warm, temperate, and cold climates. A study of the travel sickness, postural oedema, package cruises, and survival at sea are presented. A chapter is devoted to the food, water, heat effects abroad. Another section focuses on the accidental hypothermia, frostbite, effects of glare, and tropical parasites infecting the skin. The book can provide useful information to travelers.

Hazardous Waste Compliance concentrates on government regulations as they relate to hazardous waste and other hazardous materials. The main focus of this book is on how to comply with these requirements as well as on other best management practices (BMP), which will ensure worker safety and business protection from the risk of the commercial penalties associated with regulations breaches. The authors provide the reader with useful techniques to enhance worker protection and promote efficiency, productivity and cost effectiveness, along with achieving the necessary quality standards for the work being performed. The authors further outline and define methods to help reduce worker injury and illness, the scope and application of HAZWOPER, and ways to implement hazardous material related requirements through enhancements of existing programs. In addition, detailed discussion helps to provide methods to help promote consistency in health and safety program development for handling hazardous materials, encourage a high standard for health and safety, and share lessons learned to help provide approaches that have been implemented on hazardous waste and other sites. Provides a comprehensive overview of

The Victorian Railways narrow gauge lines portrayed the very essence of the Australian pioneering spirit, with their ingeniously constructed routes traversing picturesque, forested and rugged country. Built in the era of the horse and cart, when railways had a monopoly over the conveyance of freight and passenger alike, the narrow gauge lines served their purpose, before being rapidly overtaken by road transport. With their toy-like appearance, the little trains were beloved by children, and this factor was to bring about their salvation. Through the valiant actions of a few spirited individuals, Victoria's narrow gauge heritage lives on, with the re-born Gembrook and Walhalla lines among the most revered and admired railways in Australia. The Narrow Gauge is a comprehensive coffee table style book, a fitting salute to a fascinating chapter in Victoria's history - the story of four character-filled railways, from their inception, through to present day operations and relics. The history of the Victorian Railways narrow gauge lines - Wangaratta to Whitfield, Upper Ferntree Gully to Gembrook, Colac to Beech Forest and Crowes, and Moe to Walhalla - from construction right through to closure. Fascinating recollections by railwaymen, locals and railway enthusiasts, including Gerald Dee, Ron Kain, Wal Larsen, Harold Lindsay, Don Marshall, Graeme O'Brien, Jim Rae, Harold 'Joe' Ramage, Dave Scott and Reg Walton - fond memories of a bygone era. A full description of all VR narrow gauge locomotives and rolling stock. A spectacular array of B&W and colour photographs - a comprehensive collection, including rare early 1950s colour transparencies. Outstanding images by Mal Austin, Phil A'Vard, Ray Bruce, Milton Collins, John Dare, Wilf Henty, Ron Kain, William Lee, Eric Quinlan, Peter Ralph, Michael Schrader and many others. Narrow gauge salvation - the remarkable story of two great railway preservation efforts, from Puffing Billy to the Walhalla Goldfields Railway. Ghosts of the narrow gauge - an illustrated guide to the remains and relics.

Special symposium by leading scholars and lawyers on intellectual property law, including patents and trademarks. The Green Issue presents cutting-edge articles on the emerging "green" movement in environmental law and its promotion through IP law. Topics include encouraging biodiversity, green labeling and fake marketing, greenwashing, miscalculation of long-term costs, and patenting environmental tech.

Shares the author's development process for eight homes in locations from New York City to New Orleans, describing how each of the elements, from fabrics to furniture, was chosen.

Explains how our bodies are programmed on a genetic level to resist weight loss, and how to fix your internal biology by adjusting your eating and exercise one step at a time to defeat hunger and cravings and keep the weight off for good. Reprint.
