## ~~Software User Guide — kansastag.gov~~

The user manual should be largely task-oriented, rather than heavily descriptive. Because the manual is written to help users understand how to execute specific tasks, the writer needs to have an understanding of those tasks as well, and as a result, going through each discrete step of each feature is absolutely essential.

## ~~User's Manual Template — ArboWebForest~~

For example, think about how much time it would take to write an article titled "Contacts." You wouldn't know where to start. So you create an outline of all the "Contacts" topics you can think of, take screenshots of the Contacts object, explain all of the menu options, and write a history of the Contacts object - all useless to an end user who just wants to know how to create a partner contact in Salesforce.
